

Invest in livestock and fishing

Rural development at the heart of food self-sufficiency

Plan

- General presentation
- Abundant animal and fisheries resources
- Reforms underway
- Investment opportunities

General presentation

General presentation

- Area: 245,857 Km²
- Population: 12 million inhabitants
- One of the highest growth rates in the world: 9.9% on average since 2016 (IMF)
- Gain of 27 ranks in the World Bank's Doing Business in 7 years
- Mobilization of more than 21 billion USD at the PNDES Advisory Group for 2016-2020
- Guinea-China framework agreement: 20 billion USD over 20 years for infrastructure financing

Abundant animal and fisheries resources

Livestock breeding

- A country with a strong pastoral tradition (300,000 herders)
- A diversity of agro-ecological conditions
- Presence of rich and varied natural pastures (70,000 km²)
- Water resources consisting of several river basins (1,165 waterways)
- Availability of agricultural and agro-industrial by-products for livestock feed
- A livestock (cattle, sheep and goats) made up of species and breeds characterized by their hardiness, their ability to adapt to their environment and especially their resistance to trypanosomiasis

Abundant animal and fisheries resources

Fishing

- 330 km of maritime coast
- Hydrographic network comprising 23 river basins, including 9 national and 14 transboundary
- Estimated fishing potential between 150,000 and 250,000 tons of fish/year
- Aquaculture potential estimated at 520,000 ha
- 140,000 ha of land in mangrove and back mangrove swamps
- 200,000 ha of river alluvial plains

Reforms underway

Ambitious reforms

Marketing & Food

- 1 regional livestock market
- 4 prefectural cattle markets
- 4 improved slaughter areas
- 10 pastoral boreholes equipped with solar pumping systems in the cattle breeding regions of Gaoual and Dinguiraye
- Implementation of a master plan for the development and management of pastoral areas including 124 sites

Animal health & public

- Rehabilitation of the veterinary diagnostic laboratory (USAID & FAO support)
- Construction of 4 regional laboratories in progress
- Renovation and equipment of the Livestock Farming Support and Demonstration centers in Boké and Famoïla
- Construction in Kouria of a laboratory meeting international standards (support of the World Bank REDISSE Project).

Animal production

- Annual growth of livestock by 16.25% between 2014 and 2018
- Increase of fish farming with an annual output from 100 tons of fish in 2010 to 2,400 tons of fish in 2018.
- Growth in exports of fresh fish (284%), smoked fish (163.5%) and dried fish (153.3%) between 2012 and 2018

Maritime Protection

- Revision of the Maritime Fisheries Code
- Revision of the Inland Fisheries Code
- Adoption of a new Aquaculture Code
- Creation of a maritime prefecture to board offending vessels
- Introduction of secure documents for fishing licenses

Presidential Initiatives for Rural Development

Fishing and aquaculture

Support Project for the **Development of Artisanal Fishing**, which will create 19,500 jobs in 3 years through the shipyard for the construction of fiberglass boats equipped with outboard motors

Project for the **development of shrimp farming** in the framework of public-private partnerships (Japanese collaboration)

Construction of **fish farming technical centers** in the four natural regions: (in PPP with Israelis)

Start in March 2019 of the **Commercial and Family Fish Farming Project** in 17 prefectures in collaboration with the French Development Agency

Fish farming on the high seas.

This project was initiated in 2018 for the production of marine species in floating cages for export and sale on the national market

Establishment of a **supply center for fishing inputs**

Construction of fish processing units meeting quality standards;

Establishment of **manufacturing units for packaging materials**

Stocking ponds/pools/reservoirs with fish through Guinea - Côte d'Ivoire cooperation.

Livestock breeding

Artificial bovine insemination by the introduction of seed of exotic breeds (Guinea-Moroccan cooperation). 10,000 cows will be inseminated in 2019.

Introduction of 445 exotic purebred pig spawners from Côte d'Ivoire to combat the effects of inbreeding

Introduction of 300 Maradi goats from Niger to improve the productivity of goat farms in 21 prefectures

Introduction of **5,000 Wassachiè hens from Mali** in support of 120 general interest groups of young people and women.

Program to **supply day-old chicks** from Côte d'Ivoire to poultry farmers in Forest Guinea.

Feed Improvement Program: consists in the construction of two feed plants through the private sector.

Investment opportunities

Investment opportunities

NO.	PROJECT	COST
1	Development of intensive meat and dairy production	8 million USD
2	Creation of a poultry and egg production complex in Upper Guinea	12.7 million USD
